

Conference call enables you to conduct that all important meeting, anytime, anywhere and at short notice

Conference call

Meetings are vital to the success of an organisation, but not everyone will be available to physically attend - by hosting a virtual meeting through Conference Call the ability to communicate quickly, consistently and clearly with customers is utilised.

Totem's Conference Call solution provides a platform to communicate with your clients and your team at short notice, from anywhere in the world.

So how does Conference Call work for you?

When a caller rings they are greeted by a recorded message asking them to enter the PIN access code and record their name. Once the access code has been accepted, the caller will be introduced to the meeting, alerting existing members which new delegate has joined.

The service is easy to set up. We will supply you with the conference number and unique PIN access code. All you have to do is distribute the number to be called, along with the PIN access code to those delegates that will be involved in the conference.

The benefits:

- > There is no need to pre-book conference calls which means you can arrange last minute meetings.
- > Ability to dial in from anywhere in the world, which is ideal for remote users, removing the need to travel.
- > Automatic introduction of each participant
- > No need to change your existing telecoms provider.
- > No extra equipment is required
- > Low monthly line rental (minimum 12 month contract)
